Projects

- Wonder – E-commerce Frontend
  A fully responsive, stylish UI using HTML, CSS, and JS. Features login/signup/profile modals, welcome popup, category navigation, and responsive product pages.
- MindSync – AI-Powered Learning Platform
  Startup project under Presidency Launchpad. Includes chatbot support, notes, quizzes, mock tests, and doubt resolution – all on a clean, accessible interface.

- AlgoArena – Gamified Coding Platform
  Dark-themed UI with XP progress system, algorithm quiz tests, and interactive visualizations. Built using JS, HTML, Chart.js.
- AutoBill – Retail Invoice Generator
  Top 10 out of 543 Raspberry Pi projects. Auto-generates itemized bills with totals, and converts data to printable PDF format.
- FREEJUNX – Freelance Marketing Site
  Designed a client marketing website using HTML, CSS, and JS. Delivered a ₹60K–₹75K agency-grade product at ₹9,000. Mobile-friendly, fully responsive.

Certifications

- RINEX Internship – AI & ML Basics
- Scaler Academy – Python Basics Course
- Udemy – Digital Forensics Masterclass
