

SUDHEENDRA G K

Full-Stack Developer | AI & ML Enthusiast | B.Tech Computer Science

Bengaluru, India | +91 6364800327 | sudhig10@gmail.com | github.com/Sudhi0001 | linkedin.com/in/sudheendra-g-k027

Portfolio: portfolio-jade-rho-7h1nw6o8k0.vercel.app

EDUCATION

Presidency University, Bengaluru

Expected May 2027

Bachelor of Technology in Computer Science & Engineering | CGPA: 7.84 / 10.0

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, SQL
Frontend	HTML5, CSS3, React.js, Angular, Vue.js, Responsive Web Design
Backend	Node.js, Express.js, Flask, Spring Boot, JSP, Servlets, JDBC, RESTful APIs
Databases	MySQL, MongoDB, SQL
Tools	Git, GitHub, VS Code, Eclipse, Vercel, Postman, Deployment (Vercel/Cloud)
CS Concepts	Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, OS, Computer Networks
Practices	Agile Methodology, REST API Design, Unit Testing, Debugging, Problem Solving

EXPERIENCE

Bharat Electronics Limited (BEL), Bengaluru

May 2025 – Jul 2025

AI Text Summarization Intern

- Built an AI-powered text summarization system using Python and Flask, applying NLP techniques and RESTful API design to process and condense documents efficiently.
- Handled frontend-backend integration, debugging, and evaluation workflows; contributed to unit testing and validation pipelines.
- Developed document processing and summary generation pipelines, improving processing efficiency for large text corpora.

PROJECTS

IntelliHire — AI Recruitment Platform

Python, Flask, MongoDB, RESTful APIs, HTML/CSS

github.com/Sudhi0001/IntelliHire

- Architected an AI-assisted recruitment platform using OOP principles and RESTful APIs for candidate management, interview scheduling, and assessment workflows.
- Designed MongoDB schema with CRUD operations and responsive dashboards; streamlined 3+ manual recruitment workflows through automation.

FoodHub — Full-Stack Food Ordering System

Java, JSP, Servlets, JDBC, MySQL, HTML/CSS

github.com/Sudhi0001/FoodHub

- Engineered a full-stack food ordering platform following OOP and MVC patterns; implemented user auth, session management, order processing, and CRUD operations via JDBC.
- Built an admin dashboard for real-time food item, order, and customer record management with optimized SQL database interactions.

MindSync — Peer Learning Platform

Product Design, Agile Planning, UX Research

github.com/Sudhi0001/MindSync

- Led end-to-end product development of a peer-learning platform using Agile methodology, from problem definition through iterative deployment.
- Applied user-centric design and OOP principles to build a scalable mentorship and resource-sharing experience for students.

FREEJUNX Marketing Website (Client)

HTML5, CSS3, JavaScript, SEO, Responsive Design

freejunx.in

- Delivered a production-ready, responsive marketing website for a healthy fast food startup; applied SEO best practices to improve search visibility.
- Collaborated with stakeholders via Agile iterations to translate business requirements into a live, optimized web solution.

CERTIFICATIONS

Python Programming – Scaler Academy | Java Programming – SystemTron | AI & Machine Learning Fundamentals – RINEX

ACHIEVEMENTS

- Built and deployed 4+ full-stack applications across recruitment, education, and food-tech domains, demonstrating end-to-end software engineering and problem solving skills.
- Delivered live production web solutions for real-world clients; active GitHub contributor with consistent commit history across software engineering and product development projects.
